Section 3-5 : Graphing Functions. Now we need to discuss graphing functions. If we recall from the previous section we said that $f(x)$ is nothing more than a fancy way of writing $f(y)$. This means that we already know how to graph functions. We graph functions in exactly the same way that we graph equations.

A relation is a function if every element of the domain has exactly one value in the range. So the relation defined by the equation $y = 2x - 3$ is a function.. If we look at the graph, each vertical dashed line only intersects the line at one point.

Students should work through the Graphing Basic Exponential Functions handout. It is essential that all students work through question 12 to master the learning targets for today. Question 13 is more of an extension and those ideas will also be established later in this unit if students run out of time today.
