Edition

contains up-to-date case studies on critical care conditions for applied learning. Together these books provide all the critical care nursing information you need, for one low price!

The thoroughly revised and updated edition of this classic provides a comprehensive, modern discussion of critical care nursing. Thelan's opening chapters address trends, pressing issues, and recent advances affecting the critical care student and nurse from ethics to pain management to caring for special populations. The remaining clinical units address alterations in the body's systems. Every body system unit covers Anatomy and Physiology, Clinical Assessment, Diagnostic Procedures, Disorders, and Therapeutic

care nursing. It is organized in ten units around alterations in body systems.

Stay on top of the most common and urgent issues in the critical care unit with *Priorities in Critical Care Nursing, 8th Edition*. Perfect for both practicing nurses and nursing students alike, this evidence-based text uses the latest, most authoritative research to help you identify patient priorities in order to safely and expertly manage patient care in high acuity, progressive, and critical care settings. As an "essentials" text, you can benefit from succinct coverage of all core critical care nursing topics - including medication, patient safety, patient education, problem identification, and interprofessional collaborative management. You'll

learn how to integrate the technology of critical care with the physiological needs and psychosocial concerns of patients and families to provide the highest quality care. Additionally, this new edition places a unique focus on interprofessional patient problems to help you learn to speak a consistent language of patient problems and work successfully as part of an interprofessional team. Need-to-know content reflects today's high acuity, progressive, and critical care environments! UNIQUE! Balanced coverage of technology and psychosocial concerns includes an emphasis on patient care priorities to help you provide the highest-quality nursing care. Consistent format features a Clinical Assessment and Diagnostic Procedures chapter, followed by one or more Disorders

nursing's most basic needs addressing activity and immobility, nutrition, oxygenation, and elimination, as well as special needs. Features an Intensive Care Unit with:

- James Story, a patient admitted for renal failure
- James Franklin, who has undergone a carotid endarterectomy

Includes a guided tutorial which shows students how to work with a patient in a virtual hospital

- collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions)
- record patient data
- listen to a report and itemize a patient's problems and high-priority concerns
- sometimes administer medication
- and more.

Emphasizes the importance of patient care from nursing assessment, diagnosis, and planning, to

2010 AJN Book of the Year Award Winner in Critical Care--Emergency Nursing! Designated a Doody's Core Title! "This evidence-based book is an excellent reference for ensuring high-quality management of the elderly and of their particular needs in the critical care setting." --AJN "[This] book's contents run the gamut of elder problems and care: physiology, pharmacology, nutrition, restraints, substance abuse....it is a compendium that can be used as a text or a resource." --Claire M. Fagin, PhD, RN, FAAN (From the Foreword) This book is an evidence-based, best-practices guide that directs the bedside care of critically ill elders. The book serves as a reference on major clinical issues for nurses working at the forefront of care--from nurses in critical care and step-down units to those in trauma

Read Book By Linda D Urden Thelans Critical Care

and emergency departments. Nurse educators at all degree levels will also find this book to be useful as a textbook and resource for students.

The authors provide evidence-based, practical guidelines for both the complex clinical and management aspects of care. The book offers comprehensive coverage of all the issues caregivers need to be up to date on, including the standards of practice for geriatric care, new technologies, pharmacotherapy, pain management issues, ethical issues, and much more. Key topics discussed: Strategies for patient safety for older patients in the intensive care setting Family responses to critical care of the older adult Infection, sepsis, and immune function Understanding and managing sleep disorders in older patients in the ICU Heart failure in the
