Cognitive-behavioral therapy (CBT), which encompasses exposure with response prevention (ERP) and cognitive therapy (CT), has demonstrated efficacy in the treatment of obsessive-compulsive disorder (OCD). However, the samples studied (reflecting the heterogeneity of OCD), the interventions examined (reflecting the heterogeneity of CBT), and the definitions of treatment response vary considerably across studies.

Efficacy of cognitive-behavioral therapy for obsessive ...

The central Cognitive therapy for OCD 81 theme within this model is the idea that not an event, but rather people's interpretation of an event, leads to a specific emotional response. The response to particular stimuli (thoughts, situations or events) occurs as a result of negative automatic thoughts. Salkovskis emphasized the difference ...

Cognitive therapy for obsessive-compulsive disorder ...

One of the most effective CBT developments for the treatment of Obsessive-Compulsive Disorder (OCD) and related conditions is Mindfulness-Based Cognitive-Behavioral Therapy. The primary goal of Mindfulness-Based CBT is to learn to non-judgmentally accept uncomfortable psychological experiences. From a mindfulness perspective, much of our psychological distress is the result of trying to control and eliminate the discomfort of unwanted thoughts, feelings, sensations, and urges.
