Step 1, Check your warranty. Most new computers come with at least a year of warranty. If your warranty is still active, contact the manufacturer to have it repaired for free or for a reduced price. Attempting the repair yourself will likely void the warranty. Step 2, Check the power indicator lights. If your monitor won't display an image, turn it on and watch the lights at the edge of the monitor. If one or more lights turn on, continue to the next step. If the lights won't light up, the ...

Notebook PCs only: If you do not have an ADP policy and do not want to pay for the repair of a damaged LCD, you can connect an external monitor and use the notebook as-is. Or you could purchase a keyboard, mouse, and monitor, and use the notebook like a desktop. LCD screen damage usually doesn't affect the operation of the notebook computer.

If you've made changes in the brightness and contrast controls and the screen still seems dark, you may need to take the monitor in for repair. Problem #6: Images on the screen do not match the screen size Solution. Check your monitor's documentation to see the maximum resolution you can use.

[Troubleshooting The Most Common Computer Monitor Problems](#)

If your monitor's screen is often flashing or stuttering, there are a few different problems that you could be facing. It might be something as simple as a loose or faulty video cable. So first, tighten down the cable on both the monitor and the computer end (making sure to completely tighten any retention screws, if your cable has them) or simply replace the cable.
