The primary intent of this book is to familiarize the medical practitioner with the "nail unit" in a way which will render, correctly and more easily, the diagnosis of nail diseases. At the same time, it serves to encourage the treatment and corrective measures of the abnormalities, if possible, based on anatomical and physiological knowledge. The chapters on anatomy, regeneration, and nail formation are basic to the author's intent. The content of the references quoted represents information which is proven and not controversial material. In addition, my own material not previously

published is included. I would like to introduce the anatomical concept that the nail unit consists of four different epithelial structures, each with its own characteristics, yet all interrelated. These four constituents are the Proximal Nail Fold (PNF), the Matrix (M), the Nail Bed (NB) and the Hyponychium (HYP). A disease may occur in any number of or all nail unit structures. A clear understanding of the anatomy, histology, and tissue kinetics of each constituent will be necessary and is the key factor in interpreting the abnormal findings of each of these constituents as disease occurs. It follows, therefore, that treatment and corrective measures should include the knowledge of not only the nail but also of its relationship to the bony phalanx and the digit.

Merham is a well ordered 50s seaside town - the kind of town where everyone knows their place (and those who don't are promptly put in it). Lottie Swift is an evacuee who has grown up with the respectable Holden family and loves Merham. The Holden's daughter Celia, however, chafes against the constraints on the town and longs to escape...

This volume gathers together twelve essays on the doctrine of the Trinity. It includes the work of systematic theologians, analytic theologians, and biblical scholars who address a range of issues concerning the Christian doctrine of God. Contributors include Jeremy Begbie, Julie Canlis, Douglas Campbell, William Hasker, and Christoph Schwobel. The volume also includes a new essay written by the late Robert W. Jenson shortly before his death.

Genre theory has focused primarily on the analysis of generic constructs, with increasing attention to and emphasis on the contexts in which such genres are produced, interpreted, and used to achieve objectives, often giving the impression as if producing genres is an end in itself, rather than a means to an end. The result of this focus is that there has been very little attention paid to the

ultimate outcomes of these genre-based discursive activities, which are more appropriately viewed as academic, institutional, organizational, and professional actions and practices, which are invariably non-discursive, though often achieved through discursive means. It was this objective in mind that the book develops an approach to a more critical and deeper understanding of interdiscursive professional voices and actions. Critical Genre Analysis as a theory of discursive performance is thus an attempt to be as objective as possible, rigorous in analytical endeavour, using a multiperspective and multidimensional methodological framework taking into account interdiscursive aspects of genre construction to make it increasingly explanatory to demystify discursive performance in a range of professional contexts.

Presenting the most appropriate cleansing techniques and astringent selection for proper neonatal care, the second edition of this text should help practitioners and researchers understand the effects of accidental percutaneous absorption in the newborn and therapeutic strategies for facilitating epidermal barrier development in the extremely low birthweight (ELBW) preterm infant.
