High-Yield™ Gastrointestinal Tract is the fifth in a series of High-Yield™ Systems books by a best-selling medical textbook author that cover the basic sciences of the medical school curriculum using a systems-based approach. This approach helps students integrate their first two years' course material and offers excellent preparation for USMLE Step 1 and clinical rotations. Chapters review each basic science—embryology, gross anatomy, radiology, histology, physiology, pathology, microbiology, and pharmacology—as it relates to all the organs along the gastrointestinal tract. The book is replete with radiographs, CT and MRI scans, and

Today we commonly describe ourselves as machines that "let off steam" or feel "under pressure." The Lives of Machines investigates how Victorian technoculture came to shape this language of human emotion so pervasively and irrevocably and argues that nothing is more intensely human and affecting than the nonhuman. Tamara Ketabgian explores the emergence of a modern and more mechanical view of human nature in Victorian literature and culture. Treating British literature from the 1830s to the 1870s, this study examines forms of feeling and community that combine the vital and the mechanical, the human and the nonhuman, in surprisingly hybrid and

productive alliances. Challenging accounts of industrial alienation that still persist, the author defines mechanical character and feeling not as erasures or negations of self, but as robust and nuanced entities in their own right. *The Lives of Machines* thus offers an alternate cultural history that traces sympathies between humans, animals, and machines in novels and nonfiction about factory work as well as in other unexpected literary sites and genres, whether domestic, scientific, musical, or philosophical. Ketabgian historicizes a model of affect and community that continues to inform recent theories of technology, psychology, and the posthuman. *The Lives of Machines* will be of interest to students of British literature and history, history of science and of technology, novel studies,

Evolution Trilogy...When Taylor meets Gabriel at college, she is in awe of the subtle glow that surrounds him. No one else, not even her best friend, seems to notice. Something about him scares her. Is all as it appears? While Taylor struggles for answers, she finds herself in the middle of a century old war centered on one miraculous revelation: evolution.

“It's the cure that kills.” Former D.C. politico turned private investigator Frank Bennington races to save the life of a friend. In doing so, he finds himself fighting against those representing the entrenched powers of government bureaucracy and corporate greed that would have lives lost to ensure billions in profit. This is the second installment of the very popular Bennington P.I. series. “D.W.
