Traditionally, research in engineering design has focused on quantitative methodologies whose constructs are familiar to engineers. Our assertion here is that qualitative research methodologies that are less familiar to engineers can provide unique scientific insights into the study of engineering design, enabling new findings not obtainable via quantitative methodologies.

~~Difference between qualitative and quantitative research.~~

Qualitative research methods are designed in a manner that help reveal the behavior and perception of a target audience with reference to a particular topic. There are different types of qualitative research methods like an in-depth interview, focus groups, ethnographic research, content analysis, case study research that are usually used.
