Although consensus exists among researchers that birds evolved from coelurosaurian theropods, paleontologists still debate the identification of the group of coelurosaurians that most closely approaches the common ancestor of birds. The last 20 years witnessed the discovery of a wide array of avian-like theropods that has considerably amplified the anatomical disparity among deinonychosaurians, some of which resemble Archaeopteryx more than Deinonychus. Among these newly discovered theropods that show remarkable bird-like characteristics are the four-winged theropods Microraptor and Anchiornis, and the unenlagiids Unenlagia, Buitreraptor, and Rahonavis. A bizarre group of minute-sized coelurosaurs, the Scansoriopterygidae, also exhibits some avian similarities that lead some authors to interpret them as more closely related to birds than other dinosaurs. With the aim to explore the phylogenetic relationships of these coelurosaurians and birds, we merged recently published integrative databases, resulting in significant changes in the topological distribution of taxa within Paraves. We present evidence that Dromaeosauridae, Microraptorina, Unenlagiidae, and Anchiornis + Xiaotingia form successive sister taxa of Aves, and that the Scansoriopterygidae are basal coelurosaurians not closely related to birds. The implications in the evolutionary sequence of anatomical characters leading to birds, including the origin of flight, are also considered in light of this new phylogenetic hypothesis.

A retelling of the biblical account of Bathsheba and David reveals their story through the eyes of Bathsheba.

Acts of courage come in all shapes and sizes. In the tumultuous New Orleans of 1960, thirteen-year-old Louise Collins finds her world turned upside down when a stranger from the North arrives at her mother's boarding-house. Louise's mother spends her mornings at the local elementary school with a group of women known as the Cheerleaders, who harass the school's first black student, six-year-old Ruby Bridges, as she enters the building. One day a Chevy Bel Air with a New York license plate pulls up, and out steps Morgan Miller, a man whose mysterious past is eclipsed by his intellect and open-manner—qualities that enchant mother and daughter alike. For the first time, Louise feels as if someone cares what she thinks, even if she doesn't know what she believes. But when the reason for Morgan's visit is called into question, everything Louise thinks she knows about her mother, her world, and herself will change.

A fully comprehensive guide to thermal systems design covering fluid dynamics, thermodynamics, heat transfer and thermodynamic power cycles Bridging the gap between the fundamental concepts of fluid mechanics, heat transfer and thermodynamics, and the practical design of thermo-fluids components and systems, this textbook focuses on the design of internal fluid flow systems, coiled heat exchangers and performance analysis of power plant systems. The topics are arranged so that each builds upon the previous chapter to convey to the reader that topics are not stand-alone items during the design process, and that they all must come together to produce a successful design. Because the complete design or modification of modern equipment and systems requires knowledge of current industry practices, the authors highlight the use of manufacturer's catalogs to select equipment, and practical examples are included throughout to give readers an exhaustive illustration of the fundamental aspects of the design process. **Key Features:** Demonstrates how industrial equipment and systems are designed, covering the underlying theory and practical application of thermo-fluid system design Practical rules-of-thumb are included in the text as ' Practical Notes ' to underline their importance in current practice and provide additional information Includes an instructor's manual hosted on the book's companion website

A behind-the-scenes view of the power struggles within the Vatican and “ a look inside the byzantine halls of the institutional Catholic Church. ” —Publishers Weekly A journalist who has long covered the Vatican, Marco Politi takes us deep inside the struggle roiling the Roman Curia and the Catholic Church

worldwide, beginning with Benedict XVI, the pope who famously resigned in 2013, and intensifying with the unexpected election of Jorge Mario Bergoglio, archbishop of Buenos Aires, now known as Pope Francis. Politi's account balances the perspectives of Pope Francis's supporters, Benedict's sympathizers, and those disappointed members of the laity who feel alienated by the institution's secrecy, financial corruption, and refusal to modernize. Politi dramatically recounts the sexual scandals that have rocked the church and the accusations of money laundering and other financial misdeeds swirling around the Vatican and the Italian Catholic establishment, and how Pope Francis's attempts to address these crimes has been met with resistance from entrenched factions. He writes of the decline in church attendance and vocations to the priesthood as the church continues to prohibit divorced and remarried Catholics from receiving Communion. He visits European parishes where women perform the functions of missing male priests—and where the remaining parishioners would welcome the ordination of women, if the church would allow it. Pope Francis's emphasis on pastoral compassion for all who struggle with the burden of family life has also provoked the ire of traditionalists. He knows from experience what life is like for the poor in South America and elsewhere, and highlights the contrast between the vital, vibrant faith of these parishioners and the disillusionment of European Catholics. As Pope Francis and his supporters are locked in battle with the defenders of the traditional hard line and with ecclesiastical corruption, the future of Catholicism is at stake—and it is far from certain Francis will succeed in saving the institution from decline.
