It is generally a good time for planting, especially two days before the full moon. The types of crops that prefer the second quarter are annuals that produce above ground, but their seeds form inside the fruit, such as beans, melons, peas, peppers, squash, and tomatoes. Plant just before the full moon to get the benefits of peak moisture.

Moon Phase Gardening | Planting by the Phases of the Moon

30th - 31st. First day is fine for planting beans, peppers, cucumbers, melons, and other aboveground crops where climate permits. Second day is a good day
