Instructors consistently ask for a human biology textbook that helps students develop an understanding of the main themes of biology while placing the material in the context of the human body. Mader Human Biology was developed to fill this void. Organized around the main themes of biology, Human Biology guides students to think

conceptually about biology and the world around them. Just as the levels of biological organization flow from one level to the next, themes and topics of Biology are tied to one another throughout the chapter, and between the chapters and parts through the concept of homeostasis. Combined with Dr. Mader's hallmark writing style, exceptional art program, and pedagogical framework, difficult concepts become easier to understand and visualize, allowing students to focus on understanding how the concepts are related. emphasizes the relationships of humans to other living things. Human Biology remains user friendly; relevancy and pedagogy are among its strengths. In this edition, as in previous editions, each chapter presents the topic clearly and distinctly so that students will feel capable of achieving an adult level of understanding. Detailed, high-level scientific data and terminology are not included because Dr. Mader believes that true knowledge consists of working concepts rather than technical facility..

The exercises comprising this laboratory manual are intended to supplement the text *Concepts in Biology*, but they can be used with any introductory-level biology text. Laboratory exercises begin with a list of safety issues that students need to be aware of. These items identify caustic chemicals,

equipment that needs special care or handling, and health or safety hazards a careless student may encounter.

The Mader/Windelspecht *Story: Biology* is a comprehensive introductory biology textbook for non-majors or mixed-majors courses that covers biology in a traditional order from the structure and function of the cell to the organization of the biosphere. The book, which centers on the evolution and diversity of organisms, is appropriate for a one- or two-semester course. The eleventh edition is the epitome of Mader's expertise: Its

concise, precise writing uses an economy of words to present the material as succinctly and clearly as possible, thereby enabling students -- even non-majors -- to understand the concepts without necessarily asking the instructor to explain further. Sylvia Mader represents one of the icons of science education. Her dedication to her students, coupled with her clear, concise writing style has benefited the education of thousands of students over the past three decades. Dr. Michael's Windelspecht: The integration of text and the digital world are now complete with the addition of Michael's Windelspecht's

expertise in the development of digital learning assets. For over ten years, Michael served as the Introductory Biology Coordinator at Appalachian State University, in Boone NC where he directed a program that enrolls over 4,500 non-science majors annually. Michael has acted as the leading architect in the design of the Mader media content for McGraw-Hill's ConnectPlus and LearnSmart. These assets allow instructors to easily design interactive tutorial materials, enhance presentations in both the online and traditional environments, and assess the learning objectives and outcomes of your

biology to knowledge of human concerns, what the students are able to relate to. This distinctive text was developed to stand apart from all other non-majors texts with a unique approach, unparalleled art, and a straightforward, succinct writing style that has been acclaimed by both users and reviewers. In the 15th edition, the authors have focused on the concept of inquiry and a student's inherent desire to learn. To do this, they integrated a tested, traditional learning system with modern digital and pedagogical approaches designed to stimulate and engage today's student.
