Bestselling author William Peter Blatty warms our hearts with a funny yet deeply moving nostalgic tale of memory, mystery . . . and miracles. New York, 1941: Joey El Bueno is just a smart-aleck kid, confounding the nuns and bullies at St. Stephen's school on East 28th Street when he first meets Jane Bent, a freckle-faced girl with red pigtails and yellow smiley-face barrettes who seems to know him better than he knows himself. A magical afternoon at the movies, watching Cary Grant in Gunga Din, is the beginning of a puzzling friendship that soon leaves Joey baffled and bewildered. Jane is like nobody he has ever met. She comes and goes at will, nobody else seems to have heard of her, and is it true that she once levitated six feet off the ground at the refreshment counter of the old Superior movie house on Third Avenue? Joey, an avid reader of pulp magazines and comic books, is no stranger to amazing stories, but Jane is a bewitching enigma that keeps him guessing for the rest of his life—until, finally, it all makes sense. Rich with the warmth of a bygone era, Crazy captures both the giddy craziness of youth—and the sublime possibilities of existence. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

More than twenty years have passed since Walter Auffenberg's monumental The Behavioral Ecology of the Komodo Monitor. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, " The species may well indeed survive in the wild for generations to come while countless other organisms are lost. "

A clear-eyed look at the instrumental role drugs have played in our cultural, social, and spiritual development. • First American publication of the surprising European bestseller. • Examines everything from the ancient use of ergot and datura to the modern phenomenon of "designer" drugs such as Ecstasy and crack cocaine. From remotest antiquity to the present era of designer drugs and interdiction, drugs have played a prominent role in the cultural, spiritual, and social development of civilizations. Antonio Escohotado demonstrates how the history of drugs illuminates the history of humanity as he explores the long relationship between mankind and mind-altering substances. Hemp, for example, has been used in India since time immemorial to stimulate mental agility and sexual prowess. Aristotle's disciple Theophrastus testifies to the use of datura by the ancient Greeks and further evidence links the rites at Eleusis to the ingestion of a hallucinogen. Similar examples can be found in cultures as diverse as the Celts, the ancient Egyptians, the Aztecs, and other indigenous peoples around the world. Professor Escohotado also looks at the present-day differences that exist between the more drug-tolerant societies like Holland and Switzerland and countries advocating complete repression of these substances. The author provides a comprehensive analysis of the enormous social costs of the drug war that is coming under increasing fire from all levels of society. Professor Escohotado's work demonstrates that drugs have always existed and been used by societies throughout the world and the contribution they have made to humanity's development has been enormous. The choice we face today is to teach people how to use them correctly or to continue to indiscriminately demonize them. "Just say no," the author says, is not an option. Just say "know" is. Antonio Escohotado is a professor of philosophy and social science methodology at the National University of Distance Education in Madrid, Spain. He travels widely, offering lectures and seminars on the subject of drugs and history.
