Provides: over 26,000 academic institutions, 150,000 staff and officials; extensive coverage of universities, colleges and other centres of learning; and detailed information on over 400 international cultural, scientific and educational organizations.

'Fabio Petri has been a persistent critic of marginalist theories of value and distribution. In this provocative book, he presents an extensive scrutiny of the reasons why many economists are unsatisfied with the Neo-Walrasian approach to General Equilibrium theory and why some reject it altogether. General Equilibrium, Capital and Macroeconomics throws down a challenge to all economic theorists.' - Neri Salvadori, University of Pisa, Italy 'General Equilibrium, Capital and Macroeconomics is a thorough and deep book. It contains a remarkably clear and precise statement of the conceptual, methodological and analytical difficulties besetting the demand and supply approach to economics as it is advocated in partial and general equilibrium models, old and new, micro and macro. This work covers essential parts of modern economics, it is well written and the subject matter is carefully arranged. The book will be of interest to a wide range of economists.' - Heinz D. Kurz, University of Graz, Austria This book argues that the shift in general equilibrium theory, from its early long-period to the modern very-short-period versions, has had very important consequences which are insufficiently appreciated by large parts of the economics profession. This shift has produced new difficulties, and has undermined central tenets of neoclassical macroeconomic theory (such as the negative dependence of aggregate investment on the interest rate, or the existence of a downward-sloping demand curve for labour) which had their basis in the long-period versions where capital was treated as a single factor.

This collection puts forward promising reinterpretations of the primary schools of heterodox political economy, stringent critiques of the conventional readings of the recession, new schemes of theoretical and empirical analysis of the crisis, and proposals for economic policies alternative to those hitherto adopted.

In a brief, clear and easily accessible way, this summary illustrates the dynamics of the obesity epidemic and its impact on public health throughout the WHO European Region, particularly in eastern countries. It describes how factors that increase the risk of obesity are shaped in different settings, such as the family, school, community and workplace. It makes both ethical and economic arguments for accelerating action against obesity, and analyses effective programs and policies in different government sectors, such as education, health, agriculture and trade, urban planning and transport. The summary also describes how to design policies and programs to prevent obesity and how to monitor progress, and calls for specific action by stakeholders: not only government sectors but also the private sector - including food manufacturers, advertisers and traders - and professional consumers' and international and intergovernmental organizations such as the European Union.

Internationally, globalization and increased economic integration has impacted quality of life and individual well-being. Attempts to evaluate the impact on income dispersion from this process have been extremely controversial. This key volume is the first real attempt to build up indices and a theoretical framework in order to deal with inequality of opportunity, and to enable social and political institutions to monitor increasing disparities in well-being and social exclusion. It thoroughly examines the possible relationships between the recent acceleration in economic integration and inequality among persons and countries and will enable social and political institutions to monitor increasing disparities in well-being and social exclusion. The contributions to this volume cover various subfields of economics, and examine both the negative and positive spillover effects of economic integration on individuals, social groups and nations. Since the impact of globalization on the most deprived people is multidimensional in nature, the theoretical framework is extended to a multivariate context where several individual characteristics are simultaneously considered. This original volume covers many important topics and features an impressive array of respected contributors. As such, it is sure to be an invaluable resource for postgraduates and professionals in the fields of political economy and economics.

Includes papers and proceedings of the annual meeting of the American Economic Association. Covers all areas of economic research.

Il testo è rivolto agli studenti dei corsi di laurea di Economia, Giurisprudenza, Scienze Politiche, Sociologia che devono superare l'esame di Economia politica. Utile supporto al manuale istituzionale, ma anche alla preparazione di concorsi pubblici. E' strutturato in modo tale che ogni capitolo sia corredato da un questionario e da una mappa concettuale; è consigliato per il ripasso della Microeconomia e della Macroeconomia.

Stone Age Economics is a classic study of anthropological economics, first published in 1974. Ambitiously tackling the nature of economic life and how to study it comparatively, the book includes six studies which reflect the author's ideas on revising traditional views of the hunter-gatherer and so-called primitive societies, revealing them to be the original affluent society. The book examines notions of production, distribution and exchange in early communities and examines the link between economics and cultural and social factors. It consists of a set of detailed and closely related studies of tribal economies, of domestic production for livelihood, and of the submission of domestic production to the material and political demands of society at large.

'Globalization', institutions and welfare regimes -- The challenge of globalization -- Globalization and welfare regime change -- Towards workfare? : changing labour market policies -- Labour market policies in social democratic and continental regimes -- Population ageing, GEPs and changing pensions systems -- Pensions policies in continental and social regimes -- Conclusion : welfare regimes in a liberalizing world.
