Bioactive compounds play a central role in high-value product development in the chemical industry. Bioactive compounds have been identified from diverse sources and their therapeutic benefits, nutritional value and protective effects in human and animal healthcare have underpinned their application as pharmaceuticals and functional food ingredients. The orderly study of biologically active products and the exploration of potential biological activities of these secondary metabolites, including their clinical applications, standardization, quality control, mode of action and potential biomolecular interactions, has emerged as one of the most exciting developments in modern natural medicine. *Biotechnology of Bioactive Compounds* describes the current stage of knowledge on the production of bioactive compounds from microbial, algal and vegetable sources. In addition, the molecular approach for screening bioactive compounds is also discussed, as well as examples of applications of these compounds on human health. The first half of the book comprises information on diverse sources of bioactive compounds, ranging from microorganisms and algae to plants and dietary foods. The second half of the book reviews synthetic approaches, as well as selected bioactivities and biotechnological and biomedical potential. The bioactive compounds profiled include compounds such as C-phycocyanins, glycosides, phytosterols and natural steroids. An overview of the usage of bioactive compounds as antioxidants and anti-inflammatory agents, anti-allergic compounds and in stem cell research is also presented, along with an overview of the medicinal applications of plant-derived compounds. *Biotechnology of Bioactive Compounds* will be an informative text for undergraduate and graduate students of bio-medicinal chemistry who are keen to explore the potential of bioactive natural products. It also provides useful information for scientists working in various research fields where natural products have a primary role.

A Personal Experience. The personal experiences, contributed to your pages, - have been .exceedingly helpful to me, and 1 venture to offer my mite, trusting it may be useful to others, as theirs have been to me. When I studied Christian Science, my teacher impressed on my mind the necessity of taking at least one hour in the day for reading Science And Health, the Bible, and for silent communion. I was determined to do this, and for a year was slowly, but surely gaining in spiritual understanding. But a very subtle temptation came to me, to prove me, in the form of an invitation to spend the winter with some friends, who were wholly absorbed in a life of gayety. They " sat down to eat and drink, and then rose up to play" (1 Cor 10-7). I thought, now is my opportunity to interest these dear friends in Christian Science. I soon found that whatever I did, must be through the language of silence. At first I held to the hour, but gradually the magnetism of my surroundings blinded my sense of Truth to such a degree, that society demands crowded out every other, and I excused myself by saying, it is. no use to try. " While I am with the Romans I will do as they do," and so conformed to the condition of those about me. Often the inner voice would speak to me, but I would answer, " When I get home I will make up for all the hours of time I've taken from Christian Science Study." One evening, in the midst of music and dancing, with the swiftness of an arrow, I was struck with an old belief, of which I had been healed through Christian Science treatment. It returned with tenfold poignancy. I tried to deny and overcome it, but felt that, like Sampson, I was shorn of my strength, and helpless in the midst of the enemy. I was obliged, suddenly, to withdraw from the gay sc...
