The Media Book provides today's students with a comprehensive foundation for the study of the modern media. It has been systematically compiled to map the field in a way which corresponds to the curricular organization of the field around the globe, providing a complete resource for students in their third year to graduate level courses in the U.S.

Geared towards those deployed to disaster sites as part of the response, this guide offers extensive information on how to make assessments and reports, coordinate with military in the field and participate as a member of a Disaster Assistance Response Team. Original.

'A major philosophical work by perhaps the most brilliant philosophical mind at work in France today.' Fredric Jameson Gilles Deleuze (1925-1995) was Professor of Philosophy at the University of Paris VIII. He was a key figure in poststructuralism, and one of the most influential philosophers of the twentieth century. Félix Guattari (1930-1992) was a psychoanalyst at the la Borde Clinic, as well as being a major social theorist and

radical activist. Anti-Oedipus is part of Deleuze and Guattari's landmark philosophical project, *Capitalism and Schizophrenia* - a project that still sets the terms of contemporary philosophical debate. Anti-Oedipus is a radical philosophical analysis of desire that shows how we can combat the compulsion to dominate ourselves and others. As Michel Foucault says in his Preface it is an 'Introduction to Non-Fascist Living'. Preface by Michel Foucault. Translated by Robert Hurley, Mark Seem, and Helen R. Lane

Gunnar Samuelsson questions our textual basis for our knowledge about the death of Jesus. As a matter of fact, the New Testament texts offer only a brief description of the punishment that has influenced a whole world.

I would like to distinguish between the 'history of ideas' and the 'history of thought.' The history of ideas involves the analysis of a notion from its birth, through its development, and in the setting of other ideas, which constitute its context. The history of thought is the analysis of the way an unproblematic field of experience becomes a problem, raises discussions and debate, incites new reactions, and induces crisis in the previously silent behaviors, practices, and institutions. It is the history of the way people become anxious, for example, about madness, about crime, about themselves, or about truth. Comprised of six lectures

delivered, in English, by Michel Foucault while teaching at Berkeley in the Fall of 1983, *Fearless Speech* was edited by Joseph Pearson and published in 2001. Reviewed by the author, it is the last book Foucault wrote before his death in 1984 and can be read as his last testament. Here, he positions the philosopher as the only person able to confront power with the truth, a stance that boldly sums up Foucault's project as a philosopher. Still unpublished in France, *Fearless Speech* concludes the genealogy of truth that Foucault pursued throughout his life, starting with his investigations in *Madness and Civilization*, into the question of power and its technology. The expression "fearless speech" is a rough translation of the Greek *parrhesia*, which designates those who take a risk to tell the truth; the citizen who has the moral qualities required to speak the truth, even if it differs from what the majority of people believe and faces danger for speaking it. *Parrhesia* is a verbal activity in which a speaker expresses his personal relationship to truth through frankness instead of persuasion, truth instead of flattery, and moral duty instead of self-interest and moral apathy.

A groundbreaking work that places the mechanical arts and the world of making at the heart of the Enlightenment What would the Enlightenment look like from the perspective

of artistes, the learned artisans with esprit, who presented themselves in contrast to philosophers, savants, and routine-bound craftsmen? Making a radical change of historical protagonists, Paola Bertucci places the mechanical arts and the world of making at the heart of the Enlightenment. At a time of great colonial, commercial, and imperial concerns, artistes planned encyclopedic projects and sought an official role in the administration of the French state. The Société des Arts, which they envisioned as a state institution that would foster France's colonial and economic expansion, was the most ambitious expression of their collective aspirations. Artisanal Enlightenment provides the first in-depth study of the Société, and demonstrates its legacy in scientific programs, academies, and the making of Diderot and D'Alembert's Encyclopédie. Through insightful analysis of textual, visual, and material sources, Bertucci provides a groundbreaking perspective on the politics of writing on the mechanical arts and the development of key Enlightenment concepts such as improvement, utility, and progress.

The history and literature of the Roman Empire is full of reports of dream prophecies, dream ghosts and dream gods. This volume offers a fresh approach to the study of ancient dreams by asking not what the ancients dreamed or how they experienced

dreaming, but why the Romans considered dreams to be important and worthy of recording. Dream reports from historical and imaginative literature from the high point of the Roman Empire (the first two centuries AD) are analysed as objects of cultural memory, records of events of cultural significance that contribute to the formation of a group's cultural identity. The book also introduces the term 'cultural imagination', as a tool for thinking about ancient myth and religion, and avoiding the question of 'belief', which arises mainly from creed-based religions. The book's conclusion compares dream reports in the Classical world with modern attitudes towards dreams and dreaming, identifying distinctive features of both the world of the Romans and our own culture.
