Organic Synthesis: State of the Art 2009-2011 is a convenient, concise reference that offers a summary of current research in organic synthesis. The fourth volume in the esteemed State of the Art series, the book complies two years' worth of Douglas Taber's popular weekly column, "Organic Chemistry Highlights." The series is an invaluable resource, leading chemists quickly and easily to the most significant developments in the field. -- Book Jacket.

This volume comprises chapters on the cutting-edge research in photonics undertaken at IIT Kanpur. Photonics requires scientists and engineers to work closely together in addressing challenges which are interdisciplinary in nature. At IIT Kanpur, research is being pursued in several key areas of photonics namely fiber-optics, nanophotonics, quantum optics, optical spectroscopy and imaging, biophotonics, and photonic devices. This volume brings together contributions from experts to obtain a contemporary perspective in photonics research. The reader will find articles about coherent optical communications, novel photonic nanostructures, nano-structured materials for light control, optical tweezers with nanoscale applications, quantum coherence and entanglement, photodiode arrays and quantum metrology. The volume also includes chapters on cancer diagnostics with optical tomography, protein fluctuations at microsecond scale at single-molecule level, and visualization of motion in a droplet which are interdisciplinary in nature. The contents of this book will be of use to researchers, students, and professionals working across all domains of photonics.

Chemistry deals with various properties structures and reactions of material substance. Since variety of substances are present in nature and in day to day life, the scope of chemistry is immense. Chemistry has interfaces with all scientific disciplines and a deep understanding of the subject is essential to comprehend its assimilative and distributive properties. The present work is an attempt to present an uptodate, complete and authoritative references for those who wish to maximize their knowledge in the said field.
