~~Python Scripts For Abaqus Ebook~~

In 2011 I published a book titled Python Scripts for Abaqus. The book explains how to enhance and control finite-element simulations in the Abaqus FEA software using the Python programming language. Using a Python script an analyst can automate a repetitive task, vary parameters as part of an optimization study, extract useful information from simulation output databases, or can customize the user interface.

~~Gautam Puri – Book – Python Scripts for Abaqus~~

The Abaqus Scripting Interface (ASI) is the python code that allows us to interact with Abaqus models and data. It includes many data types in a structure with methods to modify the data. In order to do things with Abaqus, we need to use this structure. If we want to use a certain output, for example, we need to know where to find it.
