This report identifies modern district energy as the most effective approach for many cities to transition to sustainable heating and cooling, by improving energy efficiency and enabling higher shares of renewables. This publication is one of the first reports to provide concrete policy, finance and technology best-practice recommendations on addressing the heating and cooling sectors in cities through energy efficiency improvements and the integration of renewables, both of which are central to the energy transition. These recommendations have been developed in collaboration with 45 champion cities, all of which use district energy, with 11 of them using it to achieve 100 per cent renewables or carbon-neutral targets.

Linked Open Data (LOD) is a pragmatic approach for realizing the Semantic Web vision of making the Web a global, distributed,

semantics-based information system. This book presents an overview on the results of the research project “ LOD2 -- Creating Knowledge out of Interlinked Data ” . LOD2 is a large-scale integrating project co-funded by the European Commission within the FP7 Information and Communication Technologies Work Program. Commencing in September 2010, this 4-year project comprised leading Linked Open Data research groups, companies, and service providers from across 11 European countries and South Korea. The aim of this project was to advance the state-of-the-art in research and development in four key areas relevant for Linked Data, namely 1. RDF data management; 2. the extraction, creation, and enrichment of structured RDF data; 3. the interlinking and fusion of Linked Data from different sources and 4. the authoring, exploration and visualization of Linked Data.

Nietzsche was wrong to repudiate democracy, since democratic politics can be more amenable to his own way of thinking than he imagined. Yet Nietzsche was right to expose fundamental flaws in traditional democratic theory, especially the modernist emphasis on human equality, rational subjectivity, and natural rights. Lawrence Hatab offers a postmodern account of democracy freed from traditional assumptions expressed in the Enlightenment project. He shows that democratic politics need not be based on egalitarianism or essentialism and need not be identified with a conformist mediocrity; rather it can be construed as an agonistic pluralism and an unrestricted meritocracy, both of which are consonant with Nietzsche's outlook.

This handbook incorporates new developments in automation. It also presents a widespread and well-structured conglomeration of new emerging application areas, such as medical systems and health, transportation, security and maintenance, service, construction and retail as well as production or logistics. The handbook is not only an ideal resource for automation experts but

also for people new to this expanding field.

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

This book offers a single publication to be utilised comprehensively as a reference manual within current mammographic clinical practice for use by assistant practitioners and practitioners as well as trainees in radiography and related disciplines. In recent years mammographic clinical practice and technology have evolved rapidly and become increasingly sophisticated, this book will cover these issues. The public feel increasingly empowered to 'have a say' in their care and expectations of their mammography experience is high. Consequently a well-trained, well-informed practitioner is of paramount importance in clinical practice today. This book addresses patient/client-related issues in the form of psychological and emotional support they may require. This will enable the reader to gain insight into the patient/client perspective and thereby assist in meeting their needs.

This provides clients with a cost-effective, highly scalable, robust solution with a planned foundation for scaling, capacity, resilience, optimization, automation, and monitoring. This book is targeted toward technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) responsible for providing cloud-computing solutions and support.

Ressentiment—the hateful desire for revenge—plays a pivotal role in Nietzsche’s *On the Genealogy of Morals*. Ressentiment explains the formation of bad conscience, guilt, asceticism, and, most importantly, it motivates the "slave revolt" that gives rise to Western morality’s values. Ressentiment, however, has not enjoyed a thorough treatment in the secondary literature. This book brings it sharply into focus and provides the first detailed examination of Nietzsche’s psychology of resentment. Unlike other books on the *Genealogy*, it uses resentment as a key to the *Genealogy* and focuses on the intriguing relationship between resentment and justice. It shows how resentment, despite its blindness to justice, gives rise to moral justice—the central target of Nietzsche’s critique. This critique notwithstanding, the *Genealogy* shows Nietzsche’s enduring commitment to the virtue of non-moral justice: a commitment that grounds his provocative view that moral justice spells the ‘end of justice’. The result provides a novel view of Nietzsche’s moral psychology in the *Genealogy*, his critique of morality, and his views on justice.
