Natural wood can be formed and shaped in many ways. However, wood turning is one of the most interesting ways. Numerous traditional examples of wood turning can be found in most homes and work places. These include, table lamps, table legs, and bowls. However, wood turning skills are as useful today as they have always been.

*Wood Turning - DESIGN AND TECHNOLOGY*

Seasoning of natural wood, is the process through which excess water / moisture is removed, leaving typically fifteen to twenty percent water content. Wood that has not been seasoned and still has a high water content is called 'green wood'. Wood that has had its water content reduced is called 'seasoned wood'.
